

CHANEG ϕ 7.3m girth gear exported to Turkey

Detail parameters:

Diameter: 7.3m

Material: GS34CrMo4

Weight: 34t

Gear modulus: 36

CHAENG customized the 7.3m girth gear for Turkey customer, using material GS34CrMo4. And the girth gear is highly praised by customers. The turkey customer said: from acquaintance to cooperation, we went to CHAENG three times. For the first time for investigation on site, it was impressive; second time for quality test, signed cooperation; third time for product acceptance, realized pleasant cooperation.

Advantages of CHAENG girth gear:

1. High abrasion resistance

CHAENG adopts unique heat treatment technology to optimize the girth gear structure, and improve its hardness, wear resistance and the impact force.

2. High strength steel ensures, long working time

CHAENG uses the high-strength steel, and optimize it according to the transmission characteristics of rotary kiln and ball mill, which ensure its stability during long-time working and prolong the service life of the gears.

3. Efficient mass production, shorten the delivery time

CHAENG has strong strength for steel casting parts, and can produce in large quantities with short production time and high output.

The achievement of CHAENG also confirms the customer's choice, in just a few years, CHAENG girth gears have been sold to Henan, Guangdong, Hubei, Jiangsu, Zhejiang, South Africa, and Italy.
