

## Factors for vertical roller mill quotation

Vertical roller mill as a new grinding equipment is very popular in the market. Customers mainly concerned about the price when consulting vertical roller mill.

**Then what factors are considered when calculating the price of vertical roller mill?**

### 1. Specifications

Different customers have different demands for vertical roller mill. Different raw material requires different specifications, such as various materials with different fineness will also affect the vertical mill price. Xinxiang Great Wall Machinery (CHAENG) can handle fineness of 200-400 mesh, mainly process materials of industrial waste and ore products.

### 2. Capacity

Customers has different requirements on capacity. Some customers demand small vertical roller mill, and some customers demand the large. CHAENG can produce vertical roller mill with annual output of 100,000-1,500,000 tons.

### 3. Just vertical roller mill or EPC project

CHAENG can only supply vertical roller mill, and also provide EPC vertical roller mill production line, from material inspection to putting into production.

### **Vertical roller mill spare parts manufacture and quotation**
