

Steel castings for press machine-crossbeam, base, frame, column

CHAENG is able to manufacture high quality large steel casting parts for press machine according to users' drawings, and has supplies many large steel casting parts of press machine for press equipment manufacturers, ceramic companies and so on.

Some cases of CHAENG steel castings for press machine:

Crossbeam for press

The upper and lower crossbeams are the main parts of the ceramic machine and the press machine. CHAENG has exported as many as 20 sets of ceramic press accessories to Italy. It is shown that CHAENG steel castings has stable performance and reliable quality.

Column for press

Column is a very important component of the press machine, the role of the column is not only to support the upper beam and the cylinder, to withstand the work of tension, but also to guide the activities of the crossbeam.

One Zhejiang ceramic manufacturer repeatedly stressed the reliability of the column during looking for ceramic press column suppliers. CHAENG optimized press column casting process to meet the customer's processing needs very well.

Base for press

The base is one of the important parts in the ceramic press, which is equivalent of upper and lower beams and is the workbench of ceramic press. The ceramic press base directly contacts with the floor plate, and transmit the supporting force of support bracket to floor plate.

By now, CHAENG ceramic press bases have been applied in the manufacture of brick

press and ceramic machine many companies in Guangdong, Hubei, Jiangsu and Zhejiang, and exported to Italy.

Press Frame

The press frame directly determines the performance and service life of the press. CHAENG casting press frame has good vibration suppression performance and strong bearing capacity. CHAENG is a good choice for many press equipment manufacturers. CHAENG press frames are used in press equipment manufacture of Chongqing, Hangzhou, Jiangsu, Zhejiang and many other well-known enterprises.

Advantages of CHAENG:

1. Cost-effective

CHAENG has the advanced casting equipment, strictly follows the national level-2 detection standards, and executes 360° all-round nondestructive testing system, to ensure the reliable quality and long service life of steel castings. CHAENG is hailed as "high cost-effective steel castings manufacturer".

2. Fast delivery

CHAENG has strong technical teams, detailed production scheduling, wide range of raw materials purchase channels, and perfect logistics delivery system, making efforts to achieve as fast delivery period as required.

3. "Three-heart" service

The 24h fast response and the customer services in all 365 days rest your heart when you make choice, ease your heart when you use the products, satisfy your heart when you enjoy the services
