

Best manufacturer of large quality castings (above 1 ton)

1 Multiplicity

Not only process unit product, but also supply processing scheme for critical component of finished product

2 Good

Qualified processing quality : service life is 2-3 months longer than peers
Good Delivery service: Customers can be assured in respect of the product quality, tech support, after-selling services

WHY CHOOSE US

01 Powerful casting ability

Through years of development, Great Wall steel casting has been the largest steel casting and processing enterprises in Henan Province. The Great Wall Machinery not only introduces the latest foundry equipment and technology from overseas, but also hire top talent people as senior management and technical backbone. At present, Great wall casting steel can provide a series of service, from blank casting to final production, and key parts to full set of solutions.

02 Plenty of actual cases

Years of experience in the process of steel casting, the Great Wall steel has accumulated a wealth of experiences and cases in this field. Moreover, cooperating with top-class vertical mill manufacturers means our good strength and excellent quality, such as Denmark Smith, India Tata Group, Shanghai Bao steel, etc. Today, the cast steel castings processed by the Great Wall has won the unanimous approval of customers and exported to overseas.

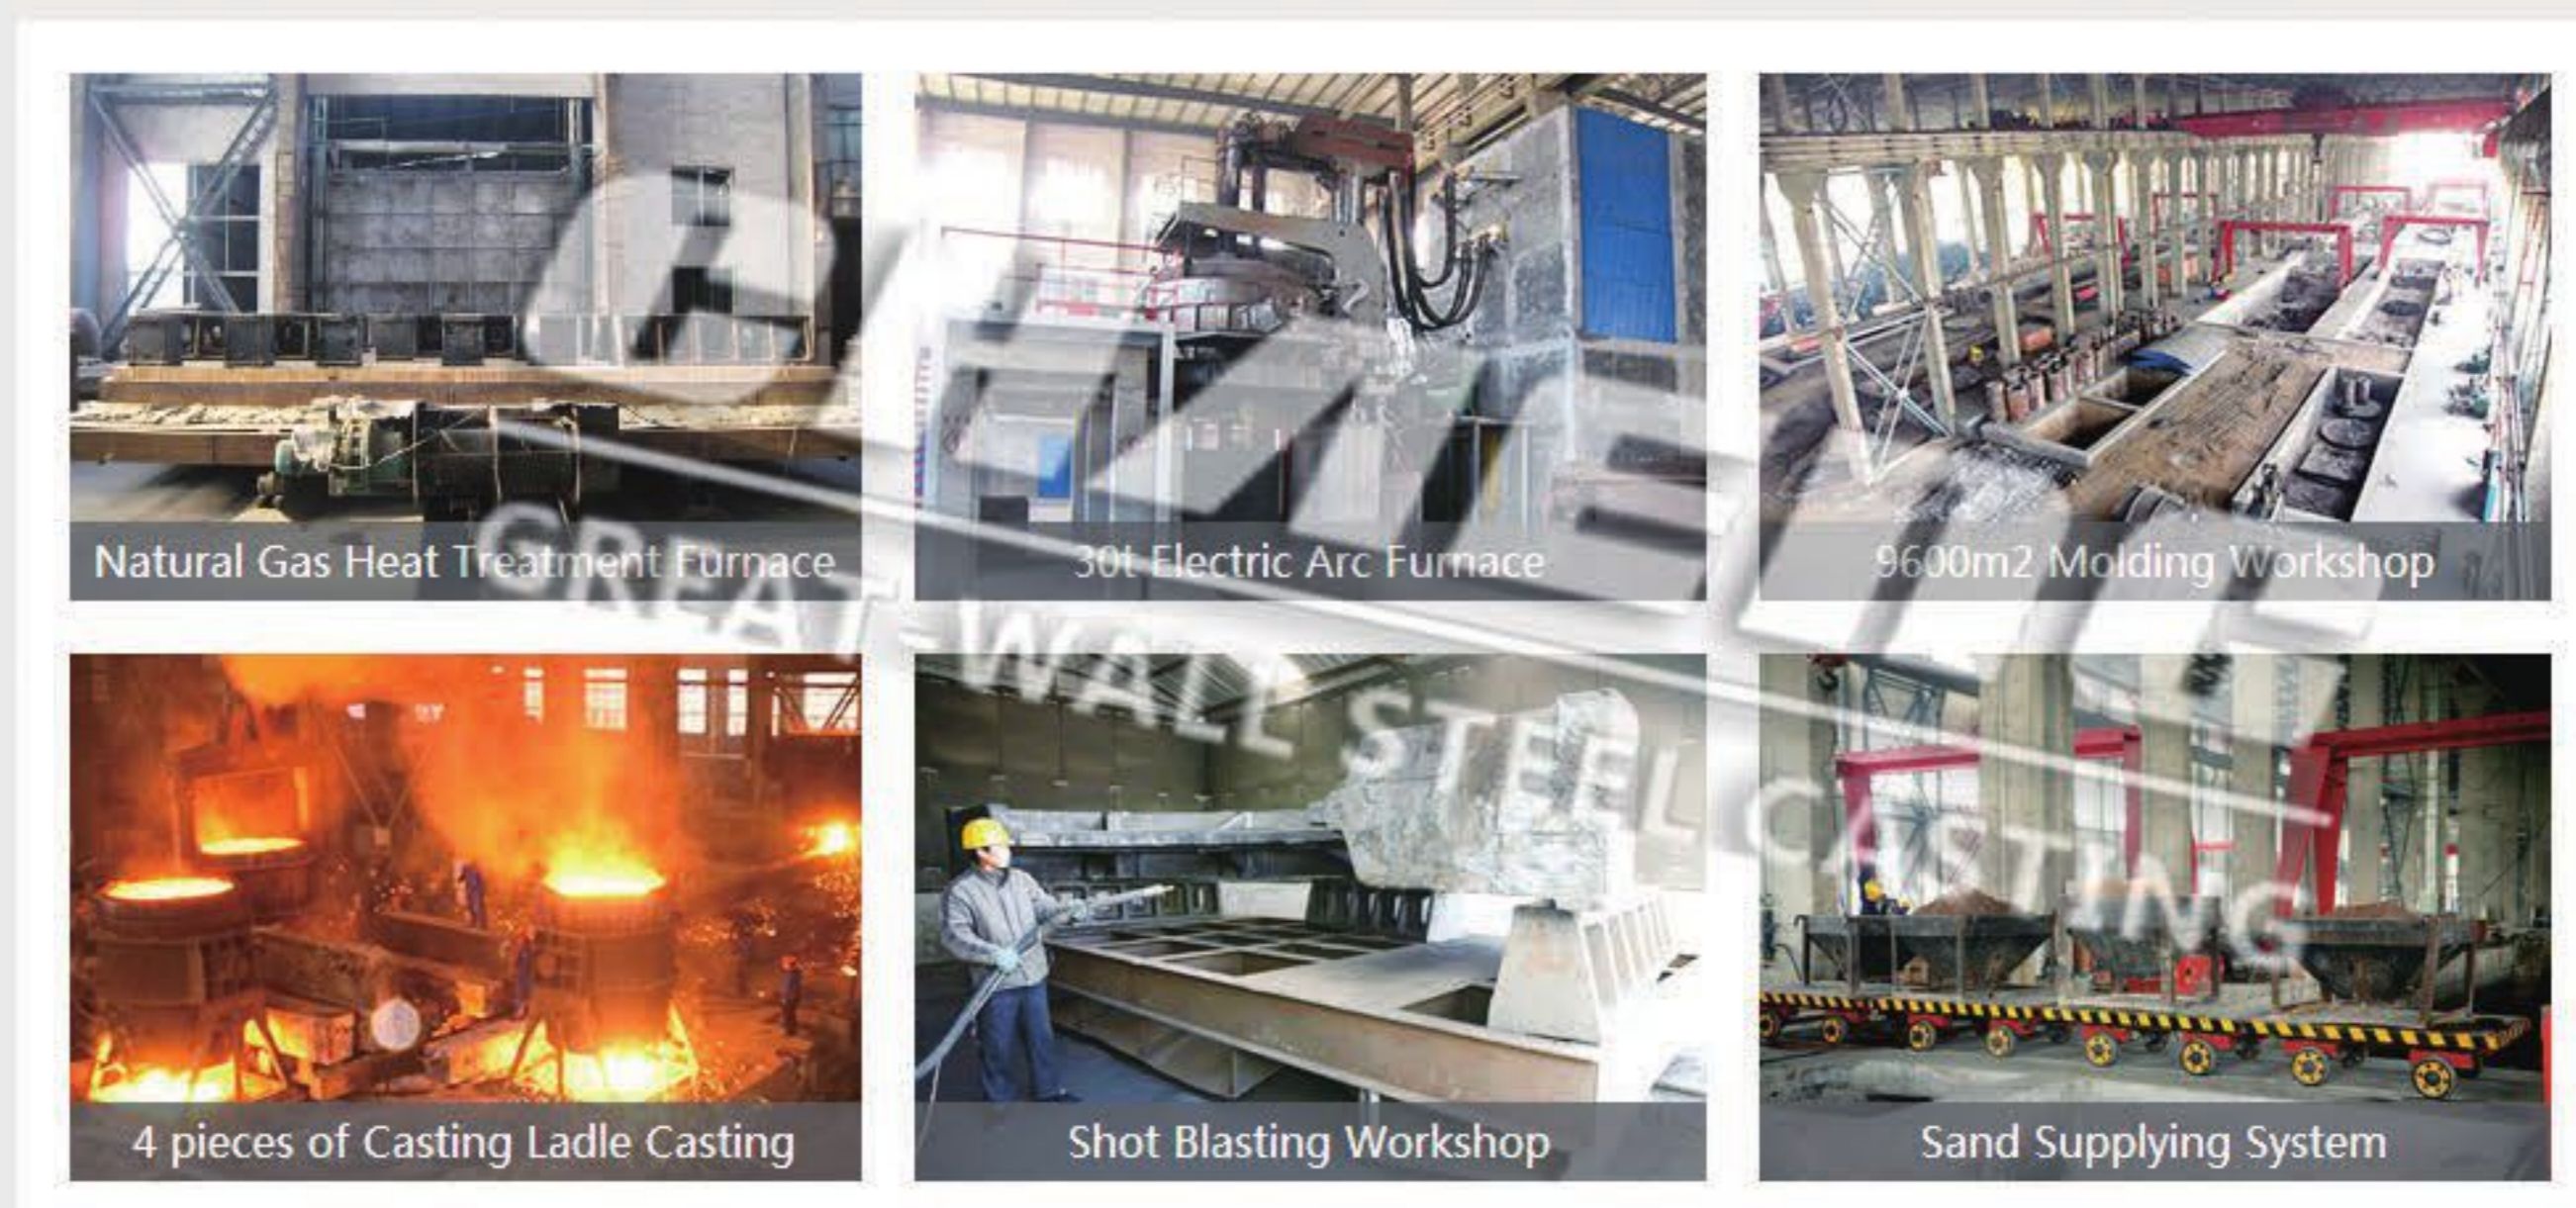

03 Excellent quality

According to different customer needs, a process plan could be designed and developed in early stage; then, strict monitoring for each casting link in mid-stage. The strict 200 degrees of non-destructive testing are used for eliminating all the defective product in the last stage. Advanced technology and meticulous casting process ensure the casting quality, and saved 2 or 3 month maintenance time comparing with other companies.
