

## High-quality Parts for Rotary Kiln

Rotary kiln can be calcined cement clinker, active lime and other materials, widely used in building materials, metallurgy, chemicals, environmental protection and many other industries. girth gear, kiln tyre, Kiln support roller and so on is the key to the rotary kiln core components, in the event of problems, companies will be forced to stop kiln, cement plant will cause significant economic losses.

Great Wall Cast Steel is a famous casting supplier, the advantages of our products:

- 1.heat treatment technology
- 2.high strength steel
- 3.wear-resistant and anti-impacting

### **Girth Gear**

**Weight:** 10~35T

**Applicable devices:** rotary kiln, ball mill

**Application:** Cement, building material, metallurgy etc.

**Customizable or not:** Yes

### **Kiln Tyre**

**Weight :** 5-80 t

**Material :** ASTM: 1045 / DIN: CK45

**Applicable devices:** rotary kiln

**Application:** Cement, Metallurgy, chemical industry, building etc.

**Customizable :** Yes

### **Kiln support roller**

**Weight :** 7~42 t

**Material :** ASTM: 1055 / DIN: 42CrMo4

**Application :** Rotary Kiln

**Customizable :** Yes

### **Riding wheel for rotary kiln**

**Weight:** 7~42T

**Applicable device:** Rotary Kilns

**Application:** Cement, metallurgy, chemical, construction industries, etc

**Customizable:** Yes
