

High-quality parts for vertical mill

Vertical mill is an ideal large-scale grinding equipment, which combines crushing, drying, grinding, grading delivery in one, high production efficiency, environmental protection, widely used in cement, electricity, metallurgy, chemical, non-metallic mineral industry. Vertical mill the purchase of spare parts to the vertical mill whether the normal operation.

Great Wall Cast Steel Casting R & D, production, processing, supporting as one, is the large steel casting production base in North of Henan Province Products exported to the United States, Germany, Russia, France, Denmark, Chile, Japan, India, South Africa and other countries and regions.

Great Wall Steel Castings provide accessories processing for slag vertical grinding mill, cement vertical mill, steel slag vertical mill, nickel slag vertical mill, raw material vertical mill, coal vertical mill and so on.

Grinding Table

Weight : 20-132 t

Material : ASTM: A570 / BS: S235JR

Application: cement, building materials, chemicals, coal, electricity, metallurgy, non-metallic minerals etc.

Customizable : Yes

Grinding roller

Weight : 20-120 t

Material : ASTM : 1030 / DIN: 30Mn4

Application : cement, building materials, chemicals, coal etc.

Customizable : Yes

Vertical Mill Rocker

Weight :10-25

Material: ASTM :1035 / DIN: CK35

Application: cement, building materials, chemicals, coal, electricity, metallurgy, non-metallic minerals etc.

Customizable or not : Yes

Wheel hub

Weight : 5-30 t

Material : ZG270-500, etc.

Application : cement/slag/GGBS/coal/raw vertical roller mill

Customizable or not : Yes
