

Ball mill end cover price

When people inquiry for steel castings, many of them always want to know price immediately, asking “how much is it nearly”, or “give me a rough price”.

Then how to get the price of customized large steel casting like ball mill end cover? CHAENG is experienced in manufacturing customized large steel castings for ball mill, and we calculate the price of the steel casting according to customers' drawings which should include dimension data, material demands, specification requirements, piece weight and so on.

CHAENG supplies ball mill end cover with:

Weight: 1-150T

Material: ZG230-450

Application: Building material industry

Customizable: Yes, based on user's drawings

Advantages of CHAENG ball mill end cover:

1. High-quality steel materials, mature technology

CHAENG has a wealth of experience in manufacturing ball mill, in the production process, we continue to adopt new technologies and new process to enhance its wear resistance and pressure performance. Our advanced level-2 flaw detection equipment can detect the interior of the end cover accurately to assure the quality.

2. Sealed well, no leakage problem

CHAENG feed cover can be produced for a specific device, making adjustments to a certain degree to make end cove joint better with feed components without gaps, to prevent material leakage problem.

3. Stable operation, long service life

CHAENG ball mill end cover adopts high-strength steel, and its structure is optimized by professional engineers according to the operation characteristics of ball mill, to greatly

ensure the long-term operation stability and prolong the long service life.
