

Custom casting spare parts for cement plant - CHAENG's featured product

Heavy steel casting manufacturer - Great Wall Casting (CHAENG) has been committed to providing customers with high-quality steel castings for more than ten years. Based on the three leading industries of metallurgy, building materials, and forging, CHAENG mainly produces carbon steel castings, manganese steel castings, and high-alloy steel castings with a unit weight of 1-120 tons.

Over the years, CHAENG has cooperated with many domestic and foreign cement factories to provide customized processing services for large cast steel spare parts for cement machinery such as ball mills, vertical mills, rotary kilns, and dryers, and has received wide acclaim.

Based on rich manufacturing experience and advanced equipment, CHAENG can offer high-quality girth gears for ball mills, rotary dryers, and rotary kilns according to users' drawings and requirements.

The rotary kiln support roller assembly is an important component to carry all the weight of the kiln body, refractories, and materials.
