## Rotary dryer rotary drum girth gear, tyre, support roller

The girth gear, tyre (riding ring) and support roller are important components of rotary dryer. For many years, CHAENG has provided large girth gears, tyres and supporting rollers for many building materials equipment at home and abroad, and has been widely praised in the market.

So what are the advantages of CHAENG?

1. 15 years experience in the production of large steel castings
2. Since its establishment in 2007, CHAENG has continued to develop in the field of large-scale steel casting production. Over the past 15 years, CHAENG has overcome difficulties and moved forward all the way, and developed into a large-scale steel casting manufacturer integrating R&D, production, processing and supporting of steel castings.
3. CHAENG uses advanced flaw detection equipment to conduct non-destructive testing on each product to ensure the internal quality of the product.
4. CHAENG possesses complete large-scale casting equipment, the testing methods, and the testing equipment. Its annual production capacity can reach more than 50,000 tons.
5. Adhering to the business philosophy of "seeking credibility with quality and occupying the market with service", CHAENG has won a good market reputation and the trust of customers, and has established good cooperative relations with more than 2,000 customers such as Mittal, India Tata, Sinoma International, Baosteel Group, Taiwan Sinosteel, Zhejiang Tongli, etc., and the products are exported to the United States, Germany, Russia, Denmark, Chile, Japan, India, South Africa and other countries and regions.
